

## Product Information Sheet

**Product Name:** Cucumber Flavour Standard  
**Product Number:** 490-NAD-5-GMP  
**Document Code:** PIS Cucumber 0003  
**Revision Number:** 0003  
**Revision Date:** 15th February 2016

### Product Description

Cucumber GMP Flavour Standard is used in the sensory training and validation of sensory panels in the beverage industry.

When placed into a liquid this flavour standard imparts a cucumber, green vegetable like flavour. Sensory panellists should learn to taste and smell this flavour as part of a regular sensory quality control training program.

Cucumber GMP Flavour Standards are provided in powder form in single dose gelatine capsules within a pharmaceutical grade blister pack for improved product stability and ease of use.

### Product Quality - GMP Flavour Standards

All FlavorActiV GMP Flavour Standards are produced to pharmaceutical grade quality control systems and standards within our dedicated production facility.

Our flavour centre uses Good Manufacturing Practices (GMP) and this quality system has been audited and certified by the Medicines and Healthcare Regulatory Authority (MHRA).

Our dedicated flavour centre is built to pharmaceutical grade specifications around the concept of handling flavours in liquid and powder forms in a controlled environment. This eliminates any flavour cross contamination and any extraneous taints and chemicals from entering our GMP Flavour Standards that may detract from their quality.

This ensures that each FlavorActiV GMP Flavour Standard is produced to highest quality possible.

### Product Use

1. To use a flavour standard push the gelatine capsule through the protective silver foil.
2. Prepare the volume of beverage you would like to impart the flavour to - recommended 1 litre. Allow any foam to reduce.
3. Gently tap the gelatine capsule with your finger and remove the top half.
4. Pour slowly and evenly into the beverage.
5. Swirl the beverage for a few moments to distribute the flavour.
6. Pour samples and taste the beverage with your sensory panel.

## Product Information Sheet

**Product Name:** Cucumber Flavour Standard

### Technical Specifications:

Product form:	Flavour standards in pharmaceutical grade blister packaging.
Flavour Imparted:	trans,cis-2,6-Nonadienal
FEMA flavour number:	3377
EC chemical number:	209-178-6
CAS chemical number:	557-48-2
Amount of flavour per flavour standard:	130 ng
Excipients per capsule:	β-cyclodextrin, sucrose
Average volumetric contents per flavour standard:	500 mg
Solubility:	Soluble in all liquid beverages and foodstuffs
Quality control system:	Pharmaceutical GMP quality systems
Country of manufacture:	United Kingdom

### Product Health Comments:

Acceptable daily intake – beverage (ADI) -	*According to the Joint FAO /WHO Expert Committee on Food Additives no safety concern at current levels of intake when used as a flavouring agent
Microbiological contaminants - yeast and moulds	<1000 cfu / capsule (<100 cfu per ml in 1 litre)
Microbiological contaminants - bacteria	<1000 cfu / capsule (<100 cfu per ml in 1 litre)
Additional Comments:	Flavour commonly occurs in beverages and used as a flavour additive.
Allergen Advice:	This GMP flavour standard is free from all allergens listed under EU FIC requirements and is produced in a pharmaceutical allergen free environment under strict controls with no risk of cross contamination.
